Abdullah Alghamdi

Saudi Arabia

SUMMARY

Computer Science graduate from Taif University with hands-on experience in data analysis, reporting, dashboard development, and database management. Proficient in Python, SQL, Power BI, Microsoft Excel, Pandas, and NumPy, with experience analyzing and transforming over 30,000 records into actionable insights. Skilled in developing executive dashboards, preparing technical reports, and supporting data-driven decision-making. Passionate about data analytics, business intelligence, and leveraging data to improve operational and commercial performance.

EXPERIENCE

University of Jeddah | Saudi Arabia

Tamheer Program | Data Analyst trainee | September 2025 – March 2026

Data Cleaning | Validation | Power BI | Reporting | Dashboard Development

- Cleaned, validated, and transformed over 30,000 academic and administrative records, improving data quality, consistency, and reporting accuracy.
- Developed interactive Power BI dashboards and visualizations that provided actionable insights to university leadership and supported data-driven decision-making.
- Prepared and delivered 40+ technical reports aligned with the National Data Index (NDI), contributing to organizational compliance and performance monitoring.
- Designed and maintained database structures and Entity Relationship Diagrams (ERDs) to enhance data integrity, consistency, and accessibility.

King Fahad Air Base | Saudi Arabia

Cooperative Training | June 2024 – August 2024.

Mainframe & Server Management | Computer Maintenance & Formatting | Mobile Device Configuration | Networking | Cabling & Infrastructure

- Managed Active Directory & DHCP configurations to support secure network operations.
- Performed server, printer, and hardware setup, troubleshooting, and upgrades.
- Configured Cisco IP phones using Cisco Unified Communications Manager.
- Worked on cabling, networking, and infrastructure across multiple departments.

EDUCATION

Taif University | Saudi Arabia

Bachelor's degree in computer science | GPA: 3.51/4 – Excellent with Second Class Honors | June 2025.

PROJECTS

- Graduation Project: Plant Disease Detection and Crop Recommendation App | Taif University.
 - Developed an AI-powered Android application for plant disease detection using Computer Vision and Deep Learning.
 - Trained and deployed a MobileNet model from TensorFlow library to classify plant diseases from leaf images in real time.
 - Implemented crop recommendation functionality based on soil and water salinity data.
 - Built the end-to-end solution using Python, TensorFlow, Android Development, and Machine Learning techniques.

COURSES & CERTIFICATIONS

- Oracle Cloud Infrastructure (OCI) Data Science Professional | Oracle | 8 Hours
- Data Analysis Using R Language | Tuwaiq Academy | 20 Hours
- Data Analysis & Visualization in Power BI | PASDC | 4 Hours

OTHER

- **Hard Skills: Programming languages:** Python, R, SAS, C++, JAVA, SQL, **Data Analysis:** Data Analysis, Business Analysis, Exploratory Data Analysis (EDA), Data Cleansing, Statistical Analysis, **Data Visualization:** Power BI, Dashboard Development, Reporting Libraries: Pandas, NumPy, scikit-learn, TensorFlow, **Microsoft Office:** Excel, Pivot Tables, VLOOKUP/XLOOKUP, Power Query.
- **Soft Skills:** Fast Learning | Emotional Intelligence | Communication | Problem-Solving | Analytical Thinking | Time Management | Collaboration and Teamwork | Flexibility
- **Languages:** Arabic, English (84 STEP test)
